CEILING

Our In-Ceiling Collection goes above and beyond the competition with integrator friendly features and overall musicality. Each model is a 2-way loudspeaker with a pivoting silk DPSD™ tweeter, utilizing Origin's patented Multi-Motion Pivot™ for superior aiming and dispersion. With an integrated conduit lock, heavy-duty dog-ears, and secure euro-block connections, this series is ready for installation into even the most challenging commercial environments. Black and white, low-profile paintable grilles reduce ceiling visibility and are available in square or round.

PENDANTS

By far the boldest loudspeaker available at its price point, our Commerical Collection Pendants provide superior bass and dispersion in an ultra-modern enclosure. The secret is our rear-facing tuned bass radiator that virtually doubles the cabinet size when it comes to low-end reproduction. We have the same premium transformers and silk DPSD™ tweeters as the rest of our Commerical collection, ensuring a smooth, consistent sonic signature for all of your installs, regardless of style or placement. They come

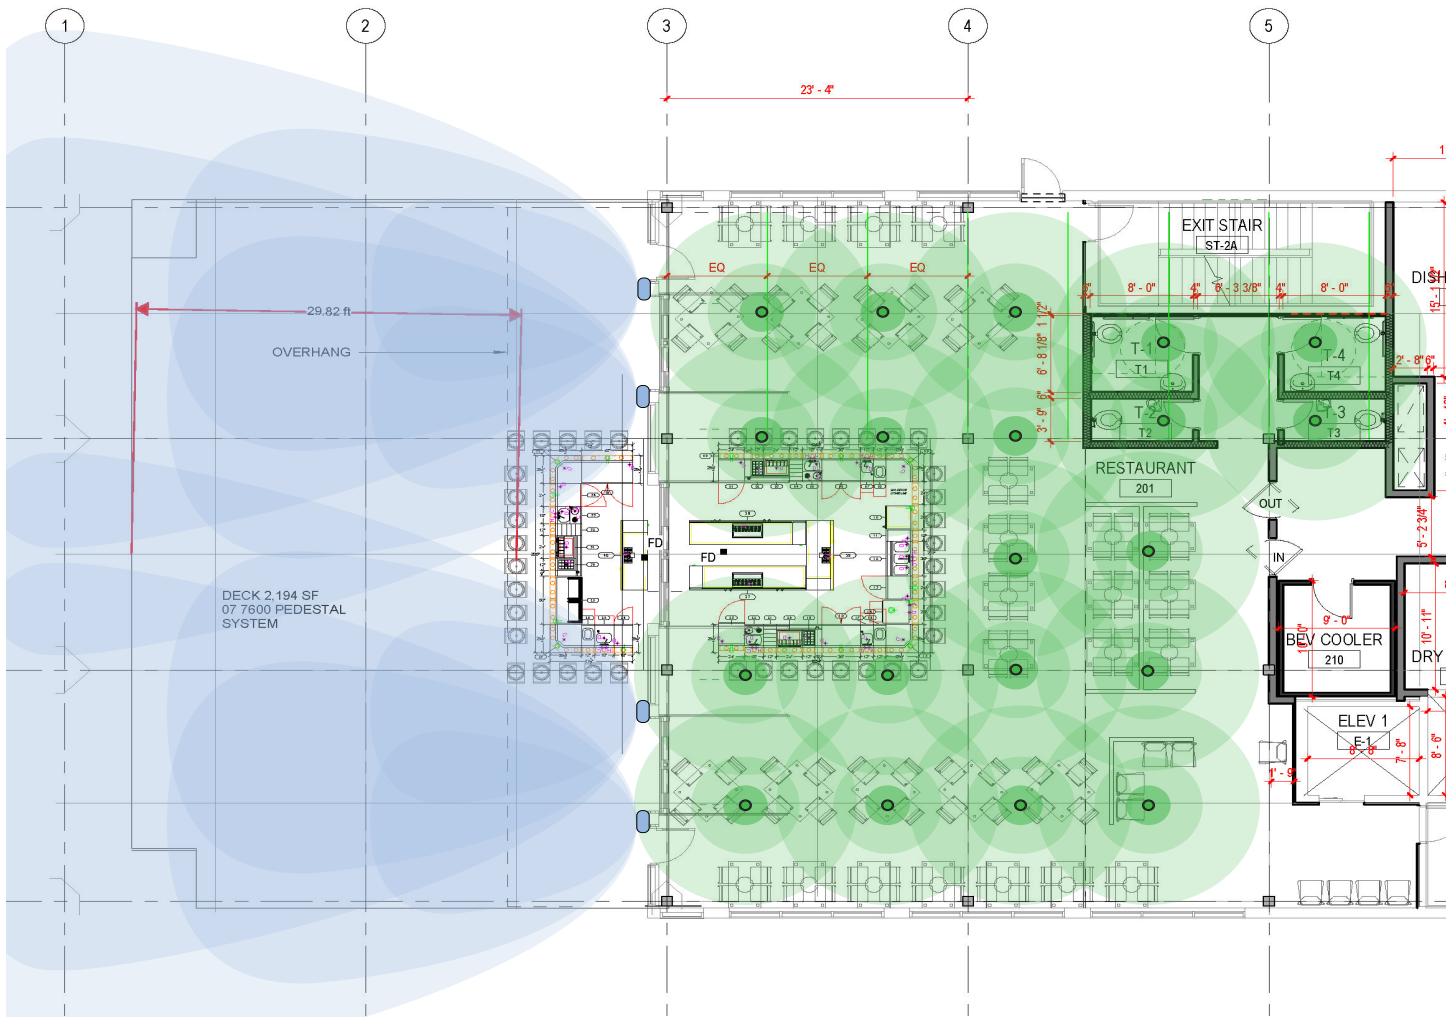

SURFACE MOUNT

These commercial on-wall loudspeakers are designed to have excellent sound quality, longevity, and a simple installation process. To ensure these on-walls are always ideally aimed towards the action, they can be orientated as desired. Better yet, they're IPX4 rated for toughness, feature high-resolution aluminum tweeters, and are available in black or white finishes.

HEAT MAP

BILL OF MATERIALS
